Summary of Conversation: Eric called to discuss results of
solidity assessment performed Sat. ~~7/28~~ 7/28. He reviewed
the following requirements in letter dated 7-9-18 which
outlined meeting at plant for reviewing the sedimentation
first truck to be completed for 90 days. ~~Submittal~~
was supposed to be provided by August 1, 2018. Eric
said 90 day time frame seemed feasible and that
he would try to provide time-frame/maintenance date
early next week.

David,

We came in this Saturday 7/28-2018 and removed the solids from tanks 2 and 3. Things went well and I believe you will be pleased with the results. Attached are two photos showing the insides of each tank. You will see some residual water and a small amount of solids but overall the solids removal was successful. Please contact me at your earliest convenience to discuss this matter further.

David,

Yes, we will remove the water as planned and have Roto remove the solids.

Thanks for the update. For some reason my voicemail is locked and nobody has yet figured out the problem. Does this mean that you will remove the water as planned then let Roto Rooter pump the solids?

David,

I left you a voice message on last Friday letting you know that I would like to have Roto Rooter come on the 28 to do the solids removal. I think this will be a better way of handling the waste removal. Please give me a call if there is a issue with that.

David,

Is this description explain the procedure enough for you?

On Thu, Jul 19, 2018 at 10:58 AM, David Adams <dadams@ci.eureka.ca.gov> wrote:

Eric,

As per our phone conversation, I am requesting a written description of the process you will use to remove solids from tank 2 on Saturday. It is understood that Lost Coast Brewery will be bypassing or changing the normal flow of the pretreatment system. Please describe the process by which the water will be pumped from tank 2 and ultimate solids removal. Please detail the equipment that will be used and what will be done with the removed solids. I have informed the collections crew and they have asked me to emphasize that activities should be performed in a manner which will not impact the collections system. Any negative impacts for which crews are called out would necessitate charges for time as well as fines.

Regards,

David Adams

Where will solids be disposed of? Please take photos of the bottom of the tanks when complete. Any documentation helps in determining the completeness of the removal.
